## Sounds and Lipshapes: the consonants

**Phonemes and Visemes** 

There are 24 consonant sounds or phonemes in Standard English.

When you make one of these sounds your neck, lips, tongue, teeth, cheeks, etc all move – so each sound has a matching lipshape known as a viseme.

Some of these visemes look very similar so it is generally accepted that there are only 12 consonant visemes.

We can divide the consonant visemes into the:

- visibles
- less visibles
- nearly invisibles

## Visibles

- 1. p/b/m for example: <u>p</u>at, <u>b</u>at, <u>m</u>at
- 2. f/v for example: <u>f</u>ew, <u>v</u>iew
- 3. w/qu for example: whale, quail
- 4. sh/ch/j for example: <u>sh</u>eep, <u>ch</u>eap, <u>j</u>eep
- 5. th for example: this
- 6. I for example: <u>lovely</u>

## Less visibles

- 7. r for example: <u>r</u>are
- 8. t/d/n for example: <u>t</u>ame, <u>d</u>ame, <u>n</u>ame
- 9.  $s/z for example: \underline{s}ip, \underline{z}ip$

## Nearly invisibles

- 10. k/g/ng for example: pi<u>ck</u>, pi<u>g</u>, pi<u>ng</u>
- 11. h for example: <u>h</u>ardy
- 12. y for example: yellow
